No Integrity Issues

Analysis Conducted:

Your manuscript has been analyzed using Proofig AI's comprehensive image integrity checks, millions of comparisons were conducted to detect and prevent multiple potential image issues!

Check Type	Description
Alteration & Manipulation	Detection of Alteration or Manipulation Within a Single Sub-Image, Including Cloning, Editing, Deletion, and Splicing. See Full Explanation
Duplication & Reuse	Detection of Duplication or Reuse Within a Single Manuscript, Including Scaling, Rotation, Flipping, Full and Partial Overlap, and Additional Irregularities. See Full Explanation
PubMed Source Plagiarism	Detection of Reuse of Sub-Images From Published Manuscripts (Plagiarism). Utilizing PubMed's Source database, which contains tens of millions of images. See Full Explanation
AI Generated Images	Detection of AI-Generated Sub-Images. Identifies images created by the most widely used model, with continuous updates for new models. See Full Explanation
My Database	Detection of Reuse of Sub-Images From your private database. Identifies images that match those in personal and private database. See Full Explanation

Article Details

Article Title
Replay in the Silent Degrees of Freedom: Continual Learning Without an Offline Phase

Journal
NeurIPS Workshop: CL4FMAgents

DOI

Authors
Yanhai Zhang, Chi Xu, Jie Zhang

Pages
16 pages

Sub-image
7 sub-image

Notes
